Energy for the World GmbH

Company Presentation

■ New Energy of the World GmbH

The idea of establishing New Energy for the World GmbH (NEW), founded end of 2010, was based on the consistent and confident partnership between the SAR Electronic GmbH in Dingolfing and Jochen Kleimaier.

■ Jochen Kleimaier

Jochen Kleimaier founder the K&S Group in Regensburg were the 'First Mover' for large-scale photovoltaic projects in Germany. Installing the first 1 megawatt power plant in the history of ground-mounted solar, in a town called Markstetten back in 2001.

In 2002 the K&S Group developed the largest PV power plant in the world. Hemau – A former storage for nuclear weapons.

SAR Electronic GmbH

SAR Electronic GmbH is an electrical installation company with its focus on the automotive industry.

All reputable automotive manufacturers in Germany are customers of SAR.

To be a constant supplier within the industry a high standard of reliability from precise process control and internal quality management are basic requirements.

This makes SAR an outstanding player in the field of electrical installations for the photovoltaic industry.

A Partner of Excellence for NEW !

■ Successful Project Development

After the first world record in 2002 this was excelled in 2003 with a power plant in Mühlhausen (6.3 MWp) whose size was unbeaten for two years.

In 2005 this excellent effort was awarded, 'Best Renewable Project' by the US Trade Press.

■ We work triple certified

The New Energy for the World GmbH is ISO certified :

- DIN ISO 9001: 2008 (Quality)
- DIN EN ISO 14001: 2009 (Environment)
- OHSAS 18001 : 2007 (Health and Safety)

All these certifications give guarantee to our customers that all processes within our company go according to plan and are subject to continuous quality controls. This is the main reason why NEW is one of the rare accredited subcontractors for Sunpower worldwide.

We offer a maximum of process control.

We know what we do!

Our services

As system integrators of PV plants we offer all services for solar parks and carports.

- Site Development - Development Planning
- Project development – Technical Planning
- Construction work - Specialist Contractors
- General contractor: Turnkey Construction
- Technical maintenance
